Dr. Robert Clark joins The Sapphire Group's Team of Experts

The Sapphire Group is pleased to announce that Robert Clark, PhD, DEE, PE is joining The Sapphire Group's team of scientists. Recently retired from the USEPA, Dr. Clark brings a particularly high level of expertise in the area of chlorination by-products in drinking water, an area where The Sapphire Group is already acknowledged as one of the leading firms. Dr. Clark, working with the water industry and others, has been engaged in this highly complex and difficult subject for many years and has assisted in determining in precise terms the extent to which chlorinated by-products are formed.

Dr. Clark has served as a member on a number of internationally recognized organizations and held national level office for the American Society of Civil Engineers and the American Water Works Association (AWWA). In 1993, he received the A.P. Black Award from the AWWA for lifetime accomplishments in drinking water research. In 2002, Dr. Clark received a Distinguished Service Career Award from the EPA. Dr. Clark has published more than 340 papers and five books.

Dr. Clark is also currently working on projects related to homeland security including reworking the risk assessment methodologies for water system vulnerability with Sandia National Laboratories and with Rutgers University's Center for Information Management, Integration and Connectivity to assist in the development of an early warning system for drinking water utilities.
